PROFESSIONAL EXPERIENCE

NORGRAINS S.A.R.L (JULY 2022 – PRESENT)

Full-Stack Web Application Developer – Laravel / Vue.js

- Designed and developed a complete MES system for managing the industrial production cycle – orders, planning, printing, cutting, quality, warehouse, delivery, and invoicing – with real-time dashboards connected to industrial PLCs (Integration of Siemens S7-1200 PLC using Node.js).
- Implemented an internal CRM for managing client and supplier relationships: payment tracking, invoicing, bank balances, automated financial reporting, and integrated scheduling for the sales department.
- Handled technical administration – local servers, hosting, DNS domains, and network infrastructure.
- Conducted functional and technical analysis of business requirements and developed custom solutions tailored to industrial processes.
- Performed full-stack development (Laravel / Vue.js): MVC architecture, REST API, authentication, roles & permissions.
- Designed and optimized relational databases according to functional needs.
- Created an intelligent WhatsApp agent (chat-bot) connected to the Laravel backend via Node.js and OpenAI API for automatic stock data consultation, maintenance notifications, and real-time reports.

- Provided maintenance and resolved technical incidents related to network, servers, and system stability.
- Worked in direct collaboration with top management to implement tailored business solutions.
- Participated in all project life-cycle phases: analysis, development, testing, deployment, and hosting.
- Developed web and mobile interfaces interconnected with Laravel APIs to ensure a smooth user experience for internal users.

TEKCY TECH AGENCY(FEB 2022 – JUN 2022)

Full-Stack Web Developer (Laravel & Angular) :

- Developed dynamic Angular interfaces using the NG-ZORRO library.
- Integrated front-end / back-end APIs built with Laravel for smooth communication between components and server logic.
- Connected and synchronized the app with external systems such as Square and Oracle Micros used for sales and POS management.
- Participated in technical design, API optimization, and data-flow management between database and front-end modules.
- Conducted functional tests and debugging with QA teams and clients.
- Attended daily meetings and used agile tools (Trello, GitLab, etc.).

BLACK-CONCEPT(MAR 2021 – AUG 2021)

Full-Stack Web Developer (Laravel & Vue) :

- Built custom web applications using Laravel 8 (back-end) and Vue.js (front-end).
- Designed and modeled relational databases based on business needs (UML / Merise).
- Developed interactive modules focused on performance and user experience.
- Performed manual testing before each Git commit to the final project.
- Collaborated with other developers to maintain code consistency and meet deadlines.

I'M CREATIVE(OCT 2020 – DEC 2020)

WordPress Developer – Showcase & E-Commerce Websites :

- Integrated themes and customized plugins according to client requirements.
- Assisted with page, menu, form, and hosting configuration.
- Completed first professional projects in web development.

FST FÈS – FACULTY OF SCIENCE AND TECHNOLOGY(FEB 2020 – MAR 2020)

Thesis Management Application Developer (PHP / PDO / MySQL / Bootstrap) :

- Developed a thesis management application using object-oriented PHP with PDO and MySQL.
- Built responsive interfaces using Bootstrap.
- Designed forms, dynamic pages, and MVC structure.
- Strengthened skills in programming logic and debugging.
